MYTH #1

Keyword Density is Key

THE TRUTH

Write naturally for the searcher’s intent. Stuffing keywords doesn’t help you rank.

MYTH #2

More Content Is Better

THE TRUTH

Quality and relevance beat volume. Thin, low-value pages can drag your whole site down.

MYTH #3

Exact Match Domain

THE TRUTH

A keyword in your domain gives little to no ranking boost. Brand and authority matter far more.

MYTH #4

SEO is a One-Time Setup

THE TRUTH

SEO never stops: you keep optimising, monitoring and adapting as search and competitors change.

MYTH #5

Links from Anyone Are Good

THE TRUTH

Only high-quality, relevant links from trusted sites help. Spammy links can hurt you.

MYTH #6

Social Media Doesn't Affect SEO

THE TRUTH

Social isn't a direct ranking factor, but the traffic and visibility it brings help SEO indirectly.

MYTH #7

Meta Descriptions Are a Ranking Factor

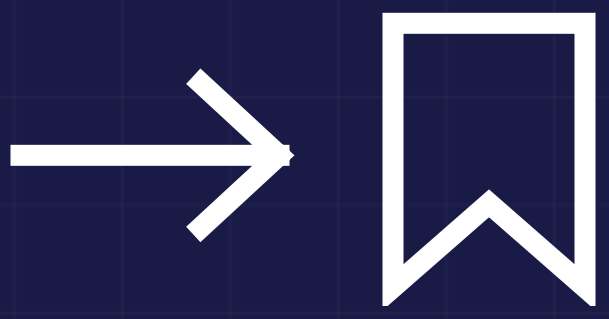

THE TRUTH

They don’t rank you directly, but a strong one lifts your click-through rate from the search results.
