PERMANENT SEO

WHY MIGRATIONS LOSE TRAFFIC

URLs change. Shopify uses fixed **/products/** and **/collections/** paths. **Every old URL needs a new home.**

WOOCOMMERCE		SHOPIFY
`/product/blue-hoodie/`	→	`/products/blue-hoodie`
`/product-category/hoodies/`	→	`/collections/hoodies`
`/about-us/`	→	`/pages/about-us`
`/2024/05/size-guide/`	→	`/blogs/news/size-guide`

Fixed paths on Shopify: `/products/` `/collections/` `/pages/` `/blogs/`

No redirect = 404. Every old URL needs a new home.

STEP 1: CRAWL THE OLD STORE

Export every URL: products, categories, pages, blog posts, images. **Use a crawler + your old sitemap.**

Crawler · yourstore.com

https://yourstore.com

Crawl complete

+ sitemap.xml added

URL	Type	Status
/product/blue-hoodie/	Product	200
/product-category/hoodies/	Category	200
/about-us/	Page	200
/2024/05/size-guide/	Blog post	200
/wp-content/uploads/hoodie.jpg	Image	200

⬇ Export all URLs (.csv)

STEP 2: PULL URLS WITH VALUE

Add URLs with clicks (GSC), traffic (GA4) and backlinks.
Some never show in a crawl.

SEARCH CONSOLE	GA4	BACKLINK TOOL
Clicks	Traffic	Links

Old URLs + value

URL	Clicks	Sessions	Links
/product/blue-hoodie/	●●●	●●●	●●
/product-category/hoodies/	●●	●●●	●
/old-sale-2023/ Not in crawl	●	●	●●●
/product/red-cap/ Not in crawl	●●	●	–

Add them to the list. They still carry value.

STEP 3: MAP ONE-TO-ONE

Old product → same new product. Old category → matching collection. **Not everything to the homepage.**

Redirect map

Old URL		New URL
/product/blue-hoodie/	→	/products/blue-hoodie
/product/red-cap/	→	/products/red-cap
/product-category/hoodies/	→	/collections/hoodies
/product-category/caps/	→	/collections/caps
/product-category/sale/	→	/ ✕ Homepage

✓ Product → same product

✓ Category → collection

STEP 4: BUILD THE REDIRECTS

Shopify: URL Redirects in admin or bulk CSV import. **Use 301s. No chains.**

Shopify admin · URL Redirects

Create URL redirect | Import

REDIRECT FROM

/product/blue-hoodie/

REDIRECT TO

/products/blue-hoodie

redirects.csv

```
1 Redirect from,Redirect to
2 /product/blue-hoodie/,/products/blue-hoodie
3 /product/red-cap/,/products/red-cap
4 /product-category/caps/,/collections/caps
```

× CHAIN

A 301 B 301 C

✓ DIRECT 301

A 301 C

STEP 5: CARRY OVER ON-PAGE SEO

Titles, meta descriptions, H1s, product copy, alt text, structured data. **Don't launch with defaults.**

- **Title tag**
  Blue Hoodie – Heavyweight Cotton | Your Store
- **Meta description**
  Soft 400gsm cotton hoodie. Free UK delivery...
- **H1**
  Blue Hoodie
- **Product copy**
  Your original description, not the theme's
- **Alt text**
  Blue cotton hoodie, front view
- **Structured data**
  Product · Offer · Review

✕ **Default:** “Blue Hoodie – Your Store” with no meta description

Muhammad Mehrooz Shafique
Co-Founder, Permanent SEO

STEP 6 + 7: TEST BEFORE AND AFTER LAUNCH

Crawl the old URL list after go-live. **Every one should 301 to a 200 page in one hop.**

`/product/blue-hoodie/` **301** → `/products/blue-hoodie` **200**

Crawl of the old URL list · after go-live

Old URL	Status	Final	Hops	
`/product/blue-hoodie/`	301	200	1	✓
`/product-category/hoodies/`	301	200	1	✓
`/about-us/`	301	200	1	✓
`/product/red-cap/`	301	200	2	Chain

STEP 8 + 9: SUBMIT AND MONITOR

Submit the new sitemap in GSC. **Watch Page indexing and 404s daily for 2–4 weeks.**

Search Console · Sitemaps

ADD A NEW SITEMAP

yourstore.com/ **sitemap.xml** Submit

sitemap.xml Success

Page indexing

Not found (404) Check daily

WATCH DAILY · 2–4 WEEKS

1	2	3	4	5	6	7	8	9	10	11	12	13	14
15	16	17	18	19	20	21	22	23	24	25	26	27	28
