Real Breakdowns
What we fix & why

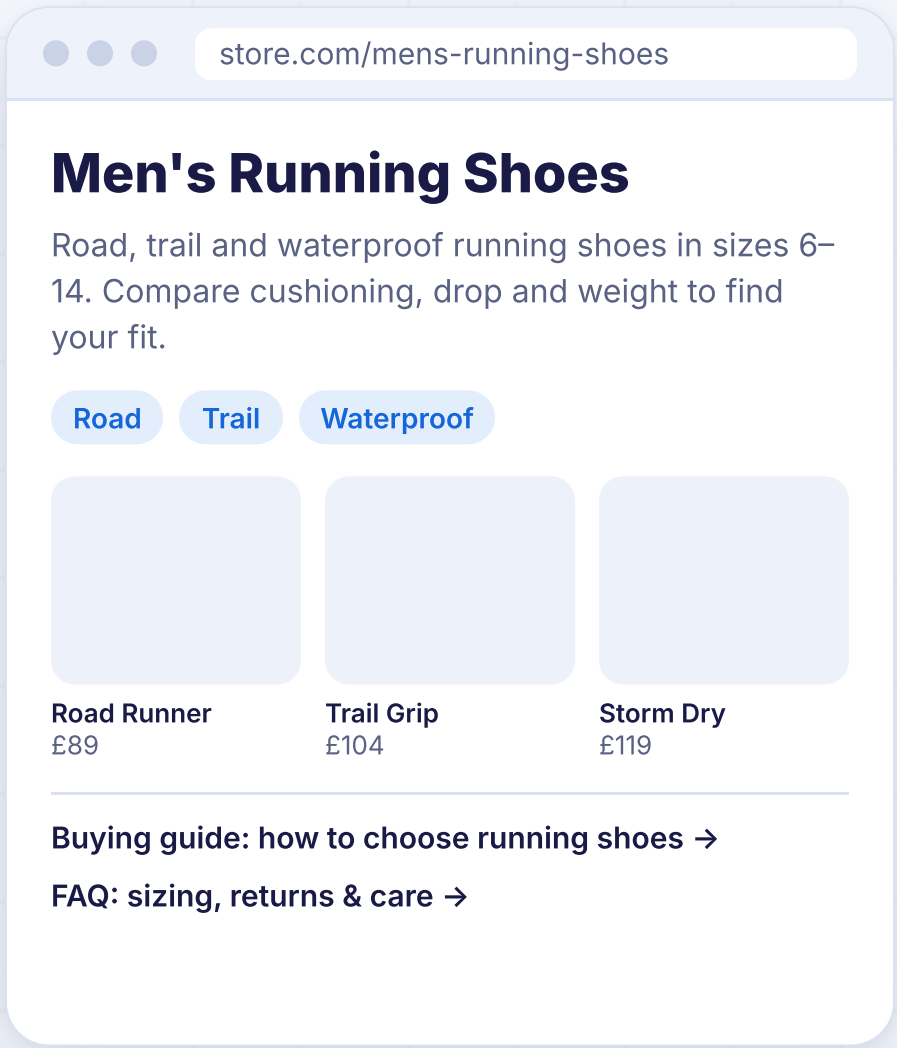

01 — THIN COLLECTION PAGES

A grid of products and no text. **Google can't tell what the page is about or why it should rank.**

✕ THIN PAGE

✓ HELPFUL PAGE

Co-Founder, Permanent SEO

02 — DUPLICATE URLS

Filters, sorting and variants can create hundreds of near-identical URLs. **Check your canonicals.**

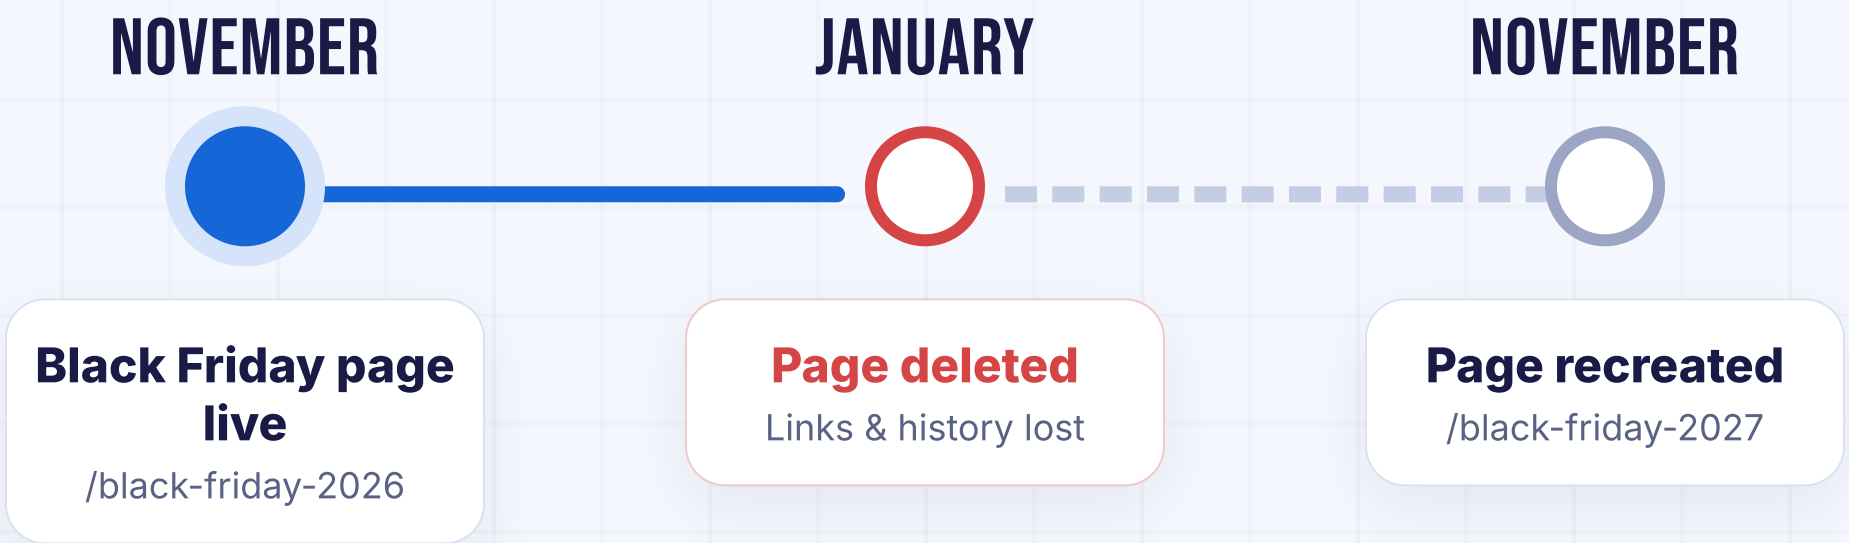

Example only. Some filter pages deserve to be indexed — review each URL pattern.

03 — DELETED SEASONAL PAGES

Every January the Black Friday page gets deleted.
Every November you start from zero.

Keep one evergreen URL: `/black-friday`
Update it every year. Keep it live between sales.

04 — OUT-OF-STOCK 404s

Removing products can cost you links and rankings.
Keep useful pages live and show alternatives.

✕ PRODUCT REMOVED

store.com/trail-runner-pro

404

Page not found

The visitor leaves.
Links to this URL lead nowhere.

● Dead end

05 + 06 — SPEED & INTERNAL LINKS

REASON 05

Slow mobile pages

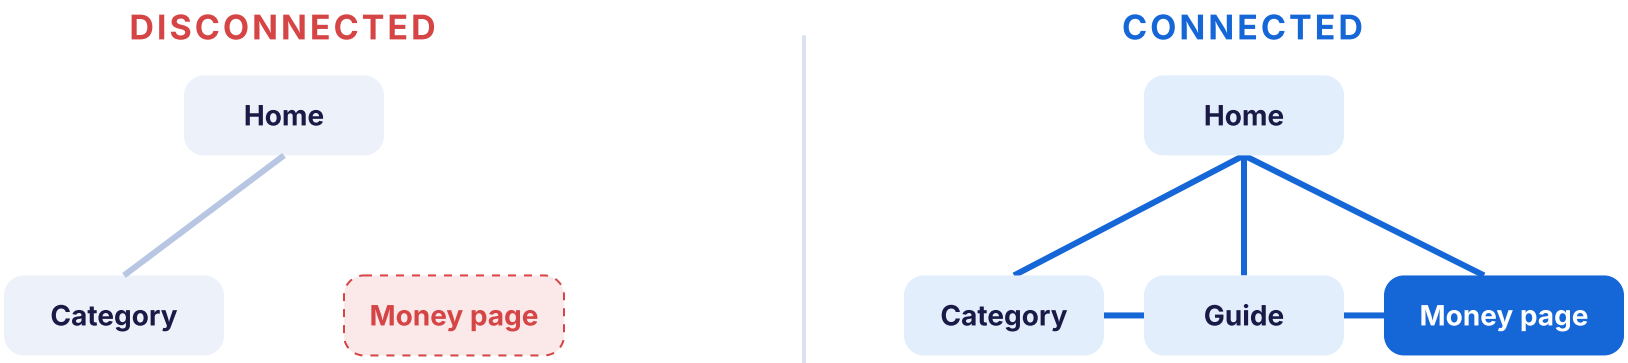

Slow mobile pages lose visitors.

Page speed

Google's "good" LCP target: 2.5 s or less.

REASON 06 **Weak internal linking**

Important money pages without internal links struggle to gain visibility.

PERMANENT SEO

07 + 08 — TITLES & BLIND SPOTS

REASON 07

Weak product titles

Product titles nobody searches for.

✓ AFTER

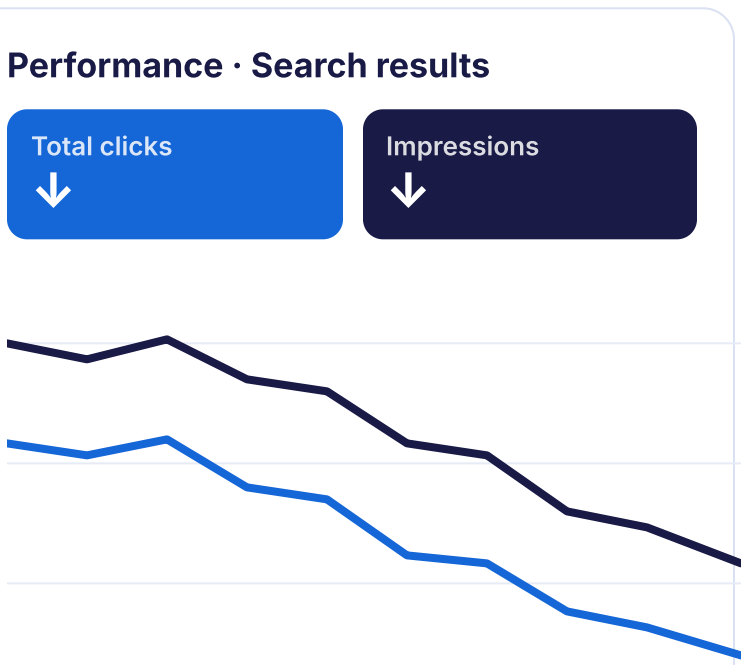

Men's Waterproof Running Shoes

Match the words buyers type.

REASON 08

Ignoring Search Console

No one opening Google Search Console.

Illustrative data — not a real store.

Drops stay hidden until sales fall.

PERMANENT SEO

THE FIX STARTS WITH A CHECK.

Not a bigger budget.
A 30-minute look at the right reports.

Search Performance
Which queries and pages are losing clicks?

Indexing & Pages
Which URLs is Google not indexing, and why?

Technical Issues
Speed, canonicals, 404s and broken links.

30 MINUTES

A first check to find the leaks.
Not a full audit — but it shows you where to look.
